

NEMJ: Clinical Images article guidelines

Clinical Images

- The NEMJ encourages submission of clinical images that captures visual discovery and unique physician experience that observed in clinical practice.
- All the images should be original and free of content that has been submitted or published elsewhere.
- Images should be high resolution and high in quality.
- Images should be submitted as TIFF, EPS, and PSD must be 1200 dpi/ppi.
- Images should be colour and not submitted as Microsoft PowerPoint, Excel, and Word format.
- Videos will be not accepted as Images.
- This section is not intended for submitting the case reports.
- A maximum of 2 authors are permitted with each image submission.
- The NEMJ reserves rights to edit or abridge submitted clinical images to publish in print, online or both.
- All clinical images should be submitted along with the consent prepared by the NEMJ and all the information related to identify a patient, including name, medical record, hospital name, and so forth should be removed in the image.
- Image with arrows and labels to identify relevant image structures. Images with no labels or arrows will also be accepted.

Manuscript:

- The title should be short with 8 words in total
- Author names, affiliations, corresponding author email should be presented in the title page
- MS word document format and should be 200 words in Times new roman, font size 12, double space with no references that should describes
 - Relevant clinical information and clinical features of the case.
 - This case should include
 - patient's history (age, gender),
 - presentation,
 - short physical and laboratory findings,
 - response to treatment (if any), and
 - condition during follow-up.
 - A teaching point that explains the clinical importance of the clinical case should be presented at the end.
- Manuscript should be submitted online using Manuscript point:
<https://bentham.manuscriptpoint.com/journals/nemj>
- If NEMJ editors deem an image is suitable for publication, the manuscript and the clinical image will be sent to double-blind peer-review and the editorial decision is made based on the reviewer recommendations.
- Manuscript not suitable for the publication will be notified in 7-10 working days.
